Dear Sir :-

--Re URGENT REQUIREMENTS FOR THE MOOSE
FACTORY SCHOOL C. of E.

The Rev. J. T. Griffin, Principal of our Society's School at Moose Factory, has presented to our Commission, in his annual report, the following information with regard to urgent requirements at his school, and I have been instructed to direct your attention to the same and to solicit your assistance in having them as fully supplied as possible.

The part of his report referred to reads as follows :-

P-R-E-S-S-I-N-G N-E-E-D-S.

1. MAIN CELLAR. In excavating the cellar under the large dining-room of the main building in the year 1921, we found that the rafters (sills?) under the floor were rotten. This necessitated temporary rafters being placed under the flooring, which was done by the Principaland boys, and propped up by round poles. This is in a very bad way and should be attended to at once. The cost would only consist of a couple of carpenters from the Hudson Bay Co. for a short time. We would use some of the lumber which we had prepared for the new byre. The cellar has never been properly finished, and it needs lumber squared on two sides to be fitted all around the walls to keep back the clay from falling out from under the foundation. If this were done, and steps fitted on the outside of the entrance to the cellar, it would secure the building from falling in and make the place more useful for storing the large quantities of potatoes,

turnips and other vegetables during the winter.

2. **BALCONY.** The outer Balcony, leading off from the Girls' room, and also under-balcony of same is very much decayed and needs a complete new one. The cost of this would not be much, as the carpenters would be instructed to fill up the pillars and battens, and the remainder of the work could be done by some of the bigger boys and painted.
3. **A NEW DOOR,** is required for the main entrance into the Dining room.
4. **A NEW LAUNDRY HOUSE.** We have a large sized house (20'6" X 14'6") which at present is used for holding Indian books and odds and ends. I would like this to be lined on the inside (it is only weather-boarded) and fitted up for use as a washing room, a place where the laundry of the school could be seen to. At present we use a partitioned portion of the study for this purpose in the winter, and outside on the grass in the summer. The books &c. can be put away in the top of the food store. This is certainly a pressing need and it would not cost much to turn it into a suitable laundry place, and it could be used for the Boys' washing room in summer.
5. **EXTENSION OF FARM.** Outside of the enclosed compound, there is a very large piece of ground off which the timber has been taken, and quantities of the stumps have been pulled out and are awaiting removal. Besides this, there is an inner portion of the ground almost cleaned- I should say perhaps about 2 acres, -which needs further work. I would suggest that this inner portion be further cleaned and enclosed by wire and posts and that potatoes be planted in same. The yearly standard price for one bag of potatoes is \$ 3.
6. **BYRE.** Last year we were able to secure a very large number of logs which came down the Moose River from a burst boom belonging to some Pulp Company. These we had sawn up into lumber and logs squared for the purpose of building a new byre for a Hay shed. The cost of sawing this 17,000 ' of lumber came to \$ 55.

In connexion with the above matters I may say that I had hoped to visit Moose Factory this summer, when I should have had an opportunity of estimating the cost of these repairs &c. after a close personal examination. As I have been obliged to postpone my visit, the estimate of the cost must be made out from the above data, and this, in the opinion of our Commission, will amount to about \$ 1,200. I shall be obliged therefore if you

will authorize an expenditure of this amount, it being understood that the sum of \$ 1,200 must not be exceeded, and only that portion of it expended which is actually required for the purposes specified above.

I remain, Sir,

Your obedient servant,

L. A. Nestgate

Dear Sir:-

In reply to your letter of June 28th, (44-6-5) requesting information with regard to the improvements which can be made this year at our Society's School at Moose Fort, I beg to state as follows:-

- | | |
|--|-----------|
| 1. Repairs to cellar | \$ 250.00 |
| 2. Repairs to balcony | 100.00 |
| 3. New roof on Day School | 150.00 |
| 4. Boys and Girls Closets | 50.00 |
| 5. Laundry house and equipment | 150.00 |
| 6. Byre | 600.00 |
| 7. Carpenter's shop | 100.00 |
| 8. $\frac{1}{4}$ mile of fencing | 100.00 |

\$1500.00

As it is important that the school management should know at the earliest date possible if the above expenditure is authorized, I should be obliged if you will furnish me with a statement in this connection at your earliest convenience.

Mr. Scott
Deputy Superintendent
of Indian Affairs
Ottawa

TORONTO, ONT. February 11, 1929

39-43 The Bible House,
Alexander Ave., Winnipeg, Manitoba

Duncan C. Scott, Esq. C.M.G.,
Deputy Superintendent General of Indian Affairs,
Ottawa, Ont.

DEPT. OF INDIAN AFFAIRS
RECORDED
FEB 15 1929

Dear Mr. Scott:-

As the summer of 1930 will mark the 25th. Anniversary of the signing of the James Bay Treaty, No. 9 and also the 25th. Anniversary of the opening of our Society's Residential School at Moose Factory, our Commission have instructed me to inform you that they consider these Anniversaries will be an opportune time to have the existing school building replaced by one that is fully modern.

As your Department has made known to our Society that it is not your policy to establish any new institutions until those already in existence, and operating, have been fully modernized and placed on a satisfactory working basis, our Commission consider that it would be in keeping with this policy, and with your building programme, to have a new school erected at this centre during the calendar year 1930. They are expecting that a new school will be built this year in northern Alberta as per the request contained in my letter addressed to the Secretary of your Department on the 24th. ulto., and after the completion of this building a new school for Moose Factory will have priority of place in our Society's list of new schools required. It is hoped that the double Anniversary referred to above may be commemorated by the erection of a fully modern school at this centre.

1930 at earliest

Commending this important matter to your sympathetic consideration, I remain, with very kind regards,

Yours very truly,

T. B. R. Westgate

TBRW/EMW

Field Secretary, M.S.C.C.

44-6-5.

EX-101

February 25, 1929.

Dear Dr. Westgate:

I have your letter of the 11th instant, urging the Department to consider the rebuilding of the Moose Fort Indian Residential School next year. The Department is finishing the Alert Bay Indian Residential School this year and is commencing the erection of the Old Sun institution. The earliest possible date for the proposed new school in the Lesser Slave district is 1930. In view of these pressing claims on the Appropriation for Indian Education, it is uncertain when funds could be provided for capital expenditure on James Bay.

Yours very truly,

Duncan C. Scott

**RESIDENTIAL SCHOOLS & IMPROVEMENTS, WHICH THE
M. S. C. C. DESIRE TO HAVE PROVIDED DURING
THE FISCAL YEAR 1930-31.**

[Handwritten signature]
noted

2. New school for Moose Factory. The present school was established on Sept. 5th, 1905, with funds provided by the Church of England, and was the first "Boarding School" established in that part of the Dominion. After 25 years of service the building is no longer fitted to meet the increased need and increased demand for educational facilities among the Indians in the surrounding areas, and consequently should be replaced at the earliest opportunity. The Indian peoples themselves have been pressing our Society for a larger and fully modern school building, and as the year 1930 will mark the 25th anniversary, not only of the establishment of the "boarding" school at this centre, but also the 25th anniversary of the signing of the Treaty with the Indians at that centre, it is earnestly hoped that provision may be made in the Departmental estimates to supply this building next year.

The extension of the T. & N.O. railway from Island Falls to a point beyond the most difficult of the rapids on the Abitibi River, and within a distance of 100 miles of James Bay, will greatly help to reduce the cost of transportation of building material. This consideration, along with the discovery of lignite in that part, and the possibility of rapid developments

in other directions, increase the urgency of having the Indian educational work placed on a satisfactory basis at the earliest date possible. The cost of operating a small school such as that at Moose Factory where the freighting costs are so heavy, and the per capita earnings so small, falls heavily on the funds of the Society, and they are extremely anxious that the situation should be so altered as to make the income and expenditure more nearly meet than at present.

The new school desired should have a capacity of not less than 100 pupils and the estimated cost is approximately \$100,000.00.

1936.

Dr. Harold W. McGill,
Director of Indian Affairs,
OTTAWA, Ont.

Dear Dr. McGill:

Your letter, dated the 4th inst, file 44-6-1, stating that my proposal to erect at the expense of the Church of England in Canada "a new building to replace the present Moose Fort Indian Residential School" was submitted by you to the Minister and that he "is disposed to favourably consider providing per capita allowances for one hundred (100) pupils, if accommodation for that number is available in the new building;" was considered by the Executive Committee of this Society at its meeting on the 15th inst.

The Executive Committee decided unanimously to proceed this summer with the erection of the building in question on the assumption that the Minister being satisfied of the accommodation provided in the new building, a further letter would be received from him definitely accepting the proposal as submitted by me to you; viz, that the provision will be made for per capita grants, at the existing rate of \$200.00, for 60 additional pupils bringing the total provision up from the present number of 40 to 100; this rate to continue unchanged for a period of 10 years after we have secured an attendance of 100 pupils in the new school.

Concerning our ability to obtain 100 pupils, the Bishop of Moosonee, who knows the Anglican Indian population of the District very thoroughly and whom I consulted on the point, states in part in his reply as follows:

"Wherever I have gone during the past three years particularly, I have been besieged with requests from parents to have their children admitted to the Moose Boarding School and have been obliged to say there was no room.... So that I have not the slightest doubt that we can secure 100 pupils for the school at Moose."

Handwritten notes:
The 20th inst
The 21st inst

Dr. Harold McGill.....2

The Principal of the School places the number that would desire admittance to the new school from 120 to as high as 150. There is, therefore, I am convinced, no question concerning an enrollment to the capacity of the school at an early date after it is erected and open.

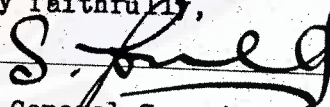

As you are aware, I think, Mr Orr is now drafting a plan for us which will ensure that the dormitory space provided has the necessary cubic air content conforming to the regulation of the Department.

Under these circumstances, I am assuming that the final and full agreement of the Hon'ble, the Minister, is assured and that I may proceed as soon as the plans are completed to take the steps necessary for the erection of the school during the coming summer since the large amount of materials necessary must be delivered at Moosonee for transportation over the ice before the Spring break-up.

It was further understood and agreed between us that the Department would provide the cost - seats, blackboards, etc - of the equipment of the new classrooms; in this case to be provided for in a separate building.

Believe me,

Yours very faithfully,

General Secretary.

R

Dear Dr. McGill:

It gives me much pleasure to enclose enlargement of my snap-shot of our new buildings at Moose Factory.

From right to left the buildings are:

1. The new Cottage Hospital.
2. The Annex, with outside scaffolding still in position, to the main building. The Annex provides on the ground floor for the laundry, the boys and girls wash rooms and the boys recreation room. The second storey consists of two very large and well-lighted classrooms. A closed and covered passageway of twenty feet connects the Annex with the main building.
3. The main building of the school. This building provides, on the ground floor - Chapel, kitchen and dining rooms for the pupils and staff; on the second floor, dormitories for junior boys and girls, office, and staff bedrooms and sitting room; on the third floor, main dormitories for senior boys and girls, with rooms for supervisors; the fourth floor, or attic, provides sewing room, large recreation room for girls and general storage rooms.

The cubic air-space provided for the dormitories is somewhat in excess of that required by the Departmental regulations

Believe me,

Yours very faithfully,

S. Gould
General Secretary.

SG:G
Encl-1

REPORT OF THE SECRETARY OF THE COMMISSION ON HIS
VISIT TO MOOSE FACTORY -

NEW BUILDINGS: The two years which elapsed since your Secretary visited this historic centre during the summer of 1935 were busy and eventful ones, and the progress made in that comparatively short time greatly exceeded his expectations. In the establishment of the fully modern Newnham Cottage Hospital, with ten beds, two cots, and one bassinette, and in the creation of a new, three and a half storey Residential School building, with ample accommodation for 100 pupils, the Church of England in Canada has furnished unquestionable proof of her deep and practical interest in all that pertains to the highest welfare of her numerous and devoted Indian people in the Moose Factory and James Bay areas. Never once, so far as your Secretary has been able to ascertain, since the arrival of John Horden (afterwards Bishop) in 1851, has the Church of England failed to provide labourers for this part of the world-wide mission field, and it is surely fitting that the good and glorious work which they began, and carried on so faithfully and so long, should now be maintained and extended by their successors with the increased resources and facilities they have at their command. The double process of maintenance and extension will be vastly stabilized and accelerated through the provision of those two very necessary and very efficient buildings, and one cannot but devoutly thank God for the abundance of wisdom and help bestowed upon the General Secretary of our Society, whereby he was enabled to find a way of making this provision possible.

THE HOSPITAL: As members have already received the printed pamphlet which furnishes considerable information about the Hospital, your Secretary does not consider it necessary to make any detailed reference to it in this report.

At the time of his visit five patients were in residence, two of them having been brought from Fort George, a distance of approximately 500 miles. ~~As two more were expected to be transferred from the Hospital at Cochrane,~~ there is ground ~~grain~~ for believing that the operating costs may be fully met by the usual for patients as made by the Indian Department.

For the time being, at any rate, Nurse Hockin, who is in charge, and Mrs Saucier, the House Matron, are quite sufficient to cope with the work, and additional help is not required.

The General Secretary recommends that responsibility for the Hospital be vested in the Commission, in the same way that the one at Hay River now stands, and your Secretary commends this recommendation to the members for sympathetic consideration and acceptance. It is the opinion of the General Secretary that the unification of control of

all the Society's work at this important centre, possesses advantages which should not be disregarded, and he expressed the hope that the members of the Commission would take the same view of the matter.

THE SCHOOL: The new buildings with the annex, the purpose of which will be described later, is pleasing in design, spacious in capacity and substantial in structure. The foundations rest on cement piles with wide footings, and the roofing material is asphalt shingles of the best quality. There is a neat little belfry on the apex of the roof at the east end, surmounted by a cross, and the bell itself, purchased by contributions from the local Indian community, has an unusually mellow tone. As the exterior of the building is painted a cream colour, with door and window frames in brown, the general effect, when viewed from a distance and against a background of green foliage, is decidedly pleasing.

THE ANNEX: At the east end of the main building (School) (which is 115 feet long by 38 feet wide) and connected therewith by a closed-in passage, there is another building, 64 feet long by 30 feet wide, which provides comfortable space on the ground floor for wash rooms for the boys and girls (each 24 feet wide by 15 feet) the laundry, the light and power plant, and a recreation room for the boys (29 feet by 15 feet.) On the upper floor it provides two well-lighted class rooms, each 30 feet by 30 feet, separated by a partition which can easily be removed when the combined space is required for an entertainment or general assembly.

Your Secretary feels confident that the detachment of the class-room work from the main school building will strongly commend itself to the members of the Commission, as it is in keeping with the policy they have been hoping for some years to have adopted at a number of the other schools under their control.

THE CHAPEL: Of all the rooms on the ground floor of the main building itself, undoubtedly the most interesting and beautiful is the one set apart, and furnished in oak, as a Chapel.

The Chapel is 50' 8" in length, 13' 4½" in width, has a Communion Table, Prayer Desk, and two chairs at the Sanctuary end, and a sufficient number of seats and kneeling boards in the nave to accommodate the staff and a capacity enrollment of pupils. The beauty and dignity of this room are greatly enriched by a window (2' 4" x 4' 2") of stained glass, located on the outside wall directly opposite to the main entrance. In the four

corners of this delightfully and artistically coloured window are excellent portraits of Bishop Horden, Archbishop Machray, Bishop Anderson, and the Rev. John East, while a panel in the lower half carries a remarkably fine reproduction of the painting of Bishop Mountain's momentous journey to the Red River. In a corresponding panel near the top of the window may be seen the lady Foundress of the W.A. as she unfolds to the Board of Management, D & F.M.S. the plans which, under Divine guidance and protection culminated in the honoured and Dominion-wide organization so well known today. In the centre of the window appears the Saviour of the World, blessing disciples gathered out of various nations, an Indian and Eskimo included, and, in the border on either side of this central group may be seen the official monogram of the M.S.C.C. and the Winchester Cross of the W.A. Few who see this window are ever likely to forget it, and one can only hope and pray that all who worship in this quiet and peaceful room may receive such fresh inspiration from the record which the memorial window carries of the heroic men and women of the past, as will enable them to dedicate their own lives to similiar great undertakings for Christ in the future. Fastened to the walls on either side of the memorial window, and becomingly framed are reproductions of the two paintings by Margaret W. Tarrant, one of which is entitled "LOVING SHEPHERD OF THE SHEEP", and the other "BEHOLD I SEND YOU FORTH".

Other rooms on the ground floor of the main school building are as follows:

1. Childrens' refectory (50' x 30')
2. Staff dining room (13'4" x 13')
3. Hall (45' x 10') with three furnaces
4. Kitchen and pantry.
5. Store room, and
6. Dairy.

At either end of the first floor are spacious childrens dormitories, one of which is 48' x 16' and the other 55'6" x 14'. Connecting these are two passage-ways, each 34' long by approximately 4'4" wide. On this floor is located the Principal's office (15'10" x 12'); the staff sitting room (32'3" x 16' 6"); three bed rooms, each 15'10" x 10'); a guest room of the same size; a women's wash room 15'10" x 7'5"; and a Supervisor's room 16'4" x 10'.

The Second Floor has two dormitories each 56' x 38' and two supervisor's rooms, each 13'4" x 9'.

The Attic provides a room for storing clothing; another room for general storage; a recreation room for girls (49'4" x 14'); and a sewing room 16' x 13'4".

All rooms throughout the building are well lighted and storm and screen windows are available for winter and summer use respectively.

FURNISHINGS AND EQUIPMENT. The annex will be heated by two Banner Furnaces, No. 333, made by the Galt Stove and Furnace Co., and the main school building by three Banner Furnaces, No. 328, year 1921, made by the same Company. The furnaces in the annex will burn wood, and those in the main school building wood and coal.

A Delco plant, Model No.25-C-1, Serial No.378902, 2500 watts, and 52 batteries will provide the light, also power to pump the water and operate the two Thor washers to be installed in the laundry.

The Water Supply is drawn from the river, with a Delco motor (Model 3747, Serial No. G26,115 volts D.C.) installed in a cement shaft on the river bank to operate the pump, and force the water through a 2" pipe to the school, a distance of some 430 feet. Due care has been given to the question of protecting the pipe against the severe frosts of winter.

There is a pressure, also a hot water tank in the laundry, a jacket heater. A table will be provided, also a stove for heating smoothing irons.

Tables and benches were available for the children's refectory, also a table for the staff dining room. Beds for the dormitories had been ordered, and there appeared to be every indication that the building would be ready for occupation by the end of the current year.

AFFILIATED BUILDINGS - such as a modern stock barn, implement shed, poultry house, piggery, etc. will have to be provided as funds from the Department or some other source become available. The "mission house," or staff part of the old school plant will be left standing and used for storing supplies. A root-house can be secured by putting a cement basement under this building. The Principal estimates that about 50 bags of cement will be required, and your Secretary recommends that the Department be asked to provide this, and the affiliated buildings mentioned.

STOCK. The School has four good horses at present, and these are sufficient for current needs. It has four cows milking, one dxy, one heifer and one bull. More cows will be required in the Spring.

THE STAFF. The numerical strength of the existing staff, if augmented by one Teacher and one Supervisor, will probably be found sufficient to handle the work of the new and larger school.

THE PRINCIPAL (Rev. Gilbert Thompson, B.A.) is a diligent and capable worker. He conducts three services each Sunday - one at 11 o'clock in the Church at Moosonee, and the other two in the Church near the School, on the Island.

THE PUPILS. The enrolment of pupils at the time of your Secretary's visit was 39, but the daily attendance at the class room was not less than 80. The non-Treaty pupils receiving classroom instruction number 25, and there are about as many Treaty Indian children from the Settlement who benefit in the same way. Rev. Louis Sampson, the Teacher, has carried on the classroom quite steadily and faithfully, but it appeared to your Secretary that his qualifications better fitted him for work amongst senior grades, and none of which are to be found at this school. He himself has a keen desire to return to ministerial work and your Secretary advised him to communicate with some Bishops with a view to securing a suitable opening.

Dr. Harold W. McGill,
Director of Indian Affairs,
Booth Building,
OTTAWA, Ont.

Dear Dr. McGill:

It gives me much pleasure to enclose photographs of the completed Bishop Horden Memorial Indian Residential School at Moose Factory. The photographs are numbered on the back as follows:

- No. 1. Front view of building with annex, showing covered way connecting them.
- No. 2. Rear view of building, and annex, showing fire escape.
- No. 3. Completed group of new buildings as a whole showing, from right to left, the Bishop Newnham Memorial Cottage Hospital, with the annex and main school building.
- No. 4. Side and front of annex, the front of main school building.
- No. 5. Interior of Chapel in the main building, showing in the middle of the right wall opposite the entrance, an historical stained glass window. Of this window I enclose separate photograph -
- No. 5A. This window represents in the bottom right hand corner, the Rev. John West, our first missionary to Rupert's Land who arrived in the Bay in 1820; next to him, bottom panel,

Dr. H.W. McGill,
Director, Indian Affairs Branch,
Department of Mines and Resources,
Ottawa, Ont.

Dear Dr. McGill:-

X X X

During the discussion of this matter it was suggested and finally agreed that the best course to take would be to build a new and larger hospital and allow the present hospital building, erected in 1938, to be used as the Principal's residence. As this building is conveniently located to the new School, and would serve very well for this purpose, the Committee hoped that the arrangement would commend itself to you and to your Department.

As the existing hospital, however, must continue in operation until a new and larger one has been provided, it was unanimously agreed by the Committee that the provision of the new hospital should be undertaken by the Government.

In support of this view it was pointed out that as the Society had erected the new School at a cost of over \$50,000.00, and the existing hospital at a cost of at least \$7,000.00, including equipment, it should not be asked or expected to make any further large expenditure for the new larger hospital required.

I was instructed, therefore, to ask you to include in your estimates for the next fiscal year the sum of at least \$10,000.00 to build the larger hospital necessary at this centre.

It was the unanimous opinion of the members of the Committee that the residence of the Principal should be provided out of Government funds, and, as the cost of materials alone, plus freight, wages, etc., for the existing hospital building amounted to not less than \$5,000.00, the Government expenditure for the two buildings will be reduced by that amount.

As the Federal Government has recently given very careful attention to the question of improving the health of its Indian wards, and has voted a very considerable sum of money for this purpose, the Committee earnestly hope that this comparatively small expenditure may be made possible next year through the provision of a hospital capable of meeting for many years to come, the medical requirements of the Indians in the Moose Factory and James Bay settlements.

Yours very truly,

T.B.R. Westgate,

Secretary of the Commission.

OTTAWA.

Dear Sir:

Re: Chlorinator for Moose Factory
Indian Residential School - Your
letter of July 22nd, File 44-6-5

On November 18th, 1941, a school girl developed symptoms referable to a diagnosis of Typhoid Fever. There had been no known contact and possible sources of carrier infection were investigated without result. Diagnosis was positively confirmed by **Widal** reaction of blood sample sent to Ontario Department of Health.

Water sample taken from the school tap at that time and sent to the Ontario Department of Health was classified as "D" with a count of colon bacilli found in 1 c.c.

I received a letter under date of December 22nd., 1941, from Mr. Hugh McIntyre, Provincial Sanitary Inspector at Kirkland Lake, from which I quote -

"The samples of water which you have had tested give very poor returns -----I may say the Mattagami River (a tributary of the Moese) has been found to be constantly infected by Typhoid as far North as Smoethrock Falls, and there is a possibility of infection occasionally from the Moese River water in consequence. Such water should not be drunk at any time without boiling."

I received a letter under date of January 10th, 1942, from W.N. Turpel, M.D., D.P.H., Division of Epidemiology, Department of Health, Ontario from which I quote /

"Dr. Berry, the Director of the Sanitary Engineering Division also suggests that you instal a small hypochlorinator machine on your pumping system, which will ensure a safe water supply to the school"

The following is quoted from a letter dated February 5th, from Dr. P.E. Moore -

"I believe that there is sufficient endemic typhoid in the North to make it advisable to vaccinate the children in the Residential school. I believe that a small chlorinating machine such as you suggest should be installed."

The following is quoted from a letter dated February 9th, received from Mr. Hugh McIntyre, Provincial Sanitary Inspector:

"I think you have very good grounds for suspecting this source of supply for drinking water (Moose River) in view of the fact that all the sewage from Timmins, Iriquois Falls, Cochrane, Smoothrock Falls, Kapuskasing and Hearst goes into its tributaries. No doubt some considerable distance separates you from these sources of pollution but such steady and long continued pollution is bound to tell in the end, especially as the discharge of paper mill waste tends to kill off fish in these rivers. My opinion is that the river water should not be used unless boiled or chlorinated. I always understood the river water at Moose Factory is brackish, especially at high tide."

The following is quoted from a letter received from Dr. Moore dated February 11th:

Subject: Requisition 43,405-15-2
Chlorination - Moose Fort, Ontario
Water Supply

Dear Sir:

In accordance with your letter of Oct. 14th, we are pleased to quote below on Hypochlorinating equipment which will feed at a constant rate dosage but will automatically stop and start in synchronism with pump operation. Our quotation also includes all accessories as mentioned in your specifications.

On one Water Motor Operated Type HWM Hypochlorinator, together with solenoid water valve, 30 gallon solution container and Ortho Tolidin Testing Outfit, we are pleased to quote, subject to the terms noted below, (FOUR HUNDRED AND NINETY-FIVE DOLLARS).....\$495.00 f.o.b. your nearest rail point, sales tax included.

This particular type of Hypochlorinator, as described by the attached Technical Publication No. 178, has the particular advantage of allowing for installation either in the pump pit or on the pump discharge line as it enters the building housing the pressure storage tank.

Placing the facilities of this organization entirely at your disposal, we are,

Very truly yours,
WALLACE & TIERNAN LIMITED.

J. B. Kinney,
Manager.

2. Mr. [unclear] please note

44-6-5

~~51-44-5~~

attention:
Mr. Gardner

Ottawa, Ontario
January 29, 1948

Dear Mr. Brault:

The Indian Affairs Branch has requested that we give consideration to allowing the sewage from the Indian Residential School at Moose Factory to be disposed of through the sewage disposal system of the hospital.

Mr. A. H. Perry of the Public Health Engineering Branch inspected the present sewage disposal system in the residential school last year when there was an outbreak of typhoid fever and made this recommendation.

We would expect the department of Mines and Resources to be responsible for any additional costs involved. It may also be possible to request Indian Affairs Branch to bear a share of the costs of the power house construction. Possibly next year's Estimates will be soon enough to ask them for funds regarding this.

Yours very truly,

P. E. Moore, M.D., D.P.H.

467-5

Moose Factory, Ont.,
March 15, 1949.

Superintendent of Education:

2653

Moose Fort Residential School:

As of noon to-day seventy pupils were confined to bed with influenza. Some of the staff are affected and off duty. Classroom activities have been suspended. There are numerous cases of the ailment in the non-school population. The fire last Saturday destroyed a large part of the drugs necessary for treatment, but emergency supplies have been obtained.

The lay-out of the school does not lend itself to convenient isolation and care of the sick.

To begin with, the dormitories are populated well beyond the limit indicated in Departmental regulations. In the girls' dormitory there is one basin with taps and one flush toilet. In the boys' dormitory there was a like installation, but the toilet has been out of order for a long time.

Food has to be carried from the basement kitchen up two stories, and there is not, of course, a supply of trays adequate for such an emergency with the natural result that there is a good deal of inconvenience and considerable mess.

The situation affords a pathetic contrast with the infirmary at Prince Albert which has flexible accommodation for both sexes, adequate plumbing, and a convenient dispensary; also equipment and other provision for serving food at the proper temperature.

It has been in my mind for some time to recommend that the Moose Fort Residential School restrict its activities to those of a hostel, and that a separate building be provided for classroom purposes and recreational, physical and vocational training. There is a growing population on this island, both Indian and non-Indian, which already overtakes the day school accommodation which the Moose Fort building can provide. Additional dormitory space is needed in the residential school where one dormitory has been converted into a third sub-standard classroom. It should be restored to its original function. Other uses could well be found for the two actual classrooms if a building of adequate size were available for school and community purposes.

Department of Mines & Resources,
Ottawa, Ontario.

Dear Major Mackay:-

Re: Purchase of Moose Factory Residential
School.

Your letter of the 23rd March re the above subject has just reached me.

I note that you give an estimated valuation of \$85,426.25 for the following buildings:

- ✓ School.
- ✓ Employees Residence.
- ✓ Stables.
- ✓ Pump House with pump.
- ✓ Store House.

I am to say that my Society accepts this estimate.

We wish to retain the building now being used as the Hospital.

The valuation of the furniture and equipment in the buildings has already been submitted to Colonel Neary.

Enclosed are Certificates of Search as to Title for parcels 1652 and 1653 on Moose Island. I am not sure in which of these parcels the above mentioned buildings are situated. The value of the actual land occupied is now under consideration.

With reference to the concluding paragraph of your letter re the power and water supply for those buildings which we shall retain, we feel that the cost of this continued service could readily be adjusted on the spot.

Yours sincerely,

L. A. Dixon.

1652 contains 113.14 Acres
1653 contains 54/100 of an Acre.
